Re: Corrected Test Results

On Thursday July 19th, AML experienced a Chemistry analyzer malfunction. During the trouble shooting process, it was discovered that erroneous results had been reported out prior to discovery of the malfunction.

All testing affected by this malfunction has been repeated and if result corrections were required, the ordering clinic was notified by phone call on the morning of Friday July 20th.

Please accept our apologies for any inconvenience that this may have caused you or your patients. If you have any questions or concerns in regards to chemistry testing performed by AML on Thursday the 19th, please contact AML Customer Service at 612-863-4678 to request repeat testing, or to verify that repeat testing has already been performed and abnormal results verified.
