

Welcome to Allina Medical Laboratories

Thank you for selecting Allina Medical Laboratories as your Reference Laboratory. It is our pleasure to join you in your effort to offer the best quality care possible for your patients.

Allina Medical Laboratories provides personal, quality laboratory services to hospitals, clinics and home care facilities. Our combined staff of more than 600 laboratory professionals, in partnership with Hospital Pathology Associates, PA, offers a comprehensive menu of laboratory services to support your diagnostic needs twenty-four hours a day, seven days a week. The integrated structure of Allina Medical Laboratories focuses on customer service, quality, and regulatory compliance and provides outstanding support throughout the continuum of care - from the primary provider to outpatient services to hospital admission and homecare.

As directors for Allina Medical Laboratories, we are available and happy to respond to any questions, comments, or needs you may have. You are the priority at Allina Medical Laboratories. Thank you for allowing us to serve you.

Sincerely,

Rick Panning, MBA, CLS (NCA)
Vice President

Yap-Yee (Chris) Chong, MD, MBA
Medical Director

Troy McCulloch, BS, MBA(c)
Finance Director

Mike Dalager, MBA, MT (ASCP)
Operations Director

Faith Whitcraft
Director of Quality and Accreditation

Bonita Paetznick, BS, MT (ASCP)
Reference Laboratory Director

ACCOUNT REPRESENTATIVES

A designated Account Representative is responsible for the design of a reference laboratory program to fit your needs. This Account Representative also provides updates on methodologies, new test offerings and additional available services. The entire staff at Allina Medical Laboratories is responsible for your customer satisfaction.

ALTERNATE COLLECTION CENTERS

For the convenience of your patients, specimens may be collected by or delivered to the laboratories at the following sites. Patients should bring an Allina Medical Laboratories request form, completely filled out, from your office or clinic. Diagnostic coding or verbiage is required for all testing that is to be billed to the patient's insurance.

For directions to these collection centers, either click on the link or type the URL into your internet address bar.

CANCELLATION OF TESTING

Requests to cancel tests and credit your account that are received before the test is run will be honored. Requests for cancellation and credit that are received after the test is run cannot be honored.

COMPLIANCE

ADVANCED BENEFICIARY NOTICE (ABN)

- Advanced Beneficiary Notices advise beneficiaries, before items or services actually are furnished, when Medicare or its replacement products are likely to deny payment from them.
- If testing does not come under Medicare guidelines for payment, a signed Advanced Beneficiary Notice must be included.

Refer to the Billing Section of this directory for further information on Advanced Beneficiary Notices (ABN's)

HIPAA

- It is Allina Medical Laboratories' policy to comply fully and consistently with all applicable laws and regulations relating to the privacy of health information. Policies and procedures have been developed and implemented to assure that all Patient Health Information is handled in an appropriate, secure manner consistent with the Health Insurance Portability and Accountability Act (HIPAA) effective April 14, 2003.

MEDICAL NECESSITY STATEMENT

- Tests ordered on Medicare and Medicare Replacement products for patients must follow CMS rules regarding medical necessity and FDA approval guidelines, and must include diagnosis, symptom or reason for testing as indicated in the medical record. If testing does not come under Medicare guidelines for payment, a "signed" Advanced Beneficiary Notice must be included. Clinical consultation regarding test ordering is provided at 612-863-4678.

MEDICARE SECONDARY PAYER (MSP)

- Medicare Secondary Payer (MSP) refers to situations where the Medicare program does not have primary responsibility for paying a beneficiary's medical expenses. The Medicare beneficiary may be entitled to other coverage, which should pay before Medicare. When requesting Allina Medical Laboratories to bill any government payer it is essential that the patient's MSP status has been verified with the beneficiary or representative and complete billing information for both primary and secondary coverage provided.

ORGAN OR DISEASE RELATED PANELS

Organ or disease related panels will only be submitted to government payers when all components are medically necessary.

OVERLAPPING TESTS

It is the providers' responsibility to assure that duplicate tests are not ordered either by overlapping panels (Example Basic Panel and Renal Panel) or by individual tests and panel orders (Example Electrolyte Panel and Potassium).

CUSTOMER SERVICE

Phone: 612-863-4678 or 1-800-281-4379

Press 1 for Customer Service
Press 2 for Lab Billing

Customer Service is staffed:
Monday through Friday 6 a.m. – midnight.
Saturday 7:30 a.m. – 7 p.m.
Sunday 10:30 a.m. – 7 p.m.

Clients are encouraged to call with questions. Hospital staff will respond to your calls outside of these hours.

QUALITY ASSURANCE

Our Quality Assurance Program monitors all testing at Allina Medical Laboratories. Review of this program and all laboratory services is under the direction of Faith Whitcraft, Director of Quality and Accreditation and Dr. Chris Chong, Medical Director.

Our Quality Assurance Program monitors two general categories of activity - Quality of Service and Quality of Analytical Results.

QUALITY OF SERVICE

Quality of service includes specimen handling, data processing, reporting of results, test turnaround time and delivery of samples, supplies and information to the client.

QUALITY OF ANALYTICAL RESULTS

Daily operations of each specialty are under the supervision of a Technical Consultant. Quality of results is ensured through the use of internal and external quality control programs and is supported by the voluntary accreditation of the laboratory by the College of American Pathologists and the American Association of Blood Banks.

QUALITY CONTROL SAMPLES

Split patient sampling for quality control of your in-house laboratory tests is available for a fee. Please contact your Account Representative for ordering and price information.

REFERRAL LAB SERVICES

Referral laboratories will be selected by Allina Medical Laboratories and tests that cannot be performed by AML will be sent exclusively to these laboratories. Requests to refer testing to alternate labs will not be honored.

TESTING

REFLEX TESTING

Reflex tests have a defined reflex test protocol. That is, based on the ordered test results, additional testing if required will be performed, reported, and billed at an extra charge. These additional tests are necessary to complete the diagnostic information needed for patient treatment. Notification by the provider is necessary if reflex testing is **NOT** desired. Please refer to the Reflex Test tab for a complete listing. This listing is updated annually and distributed in the annual compliance communication packet.

REPEAT TESTING

If a provider questions validity of a test result, the test will be repeated at no extra charge. Please contact Customer Service at 612-863-4678, Option 1, as soon as possible to request a repeat test.

Allina Medical Laboratories will not repeat a test on a specimen that has exceeded its useful life.

SPECIMEN RETENTION

There are limitations on the length of time an individual sample will be held.

- Most chemistry specimens are retained for 6 days from the date of collection.
 - Bilirubin, Direct is stable for 3 days.
 - Bilirubin, Total is stable for 5 days.
 - Carbamazepine is stable for 5 days.
 - Carbon Dioxide is stable for 4 days.
 - Ethanol is stable for 5 days.
 - Lithium is stable for 5 days.
 - Measured LDL Cholesterol is stable for 5 days.
 - Progesterone is stable for 5 days.
 - PSA is stable for 5 days.
 - Vancomycin (random, trough, or peak) is stable for 2 days.
- Hematology specimens are retained for 24 hours.
- Coagulation specimens are retained for 24 hours, if unopened and unspun.
- Other sample retention times vary.

Allina Medical Laboratories will not repeat a test on a specimen that has exceeded its useful life.

STAT TESTING

STAT testing is available 24 hours per day for specific tests. At this time, there are no additional fees for performing tests with a STAT priority. Estimated STAT turnaround time is approximately one hour from receipt at AML. You must indicate on the testing requisition if you need the results called.

For information regarding STAT courier pickups, please refer to the Specimen Transport information in the Collection and Handling section of our Directory of Services. Contact Customer Service or your Account Representative if you have questions.

TURNAROUND TIMES

Most routine testing is performed on a daily basis and results are reported in 24 hours or less. Less common tests, and tests which are referred on to a reference laboratory will have longer turnaround times.

WEBSITE

Our website can be accessed at www.allina.com/medicallaboratories. We have an electronic Collection Manual to provide you with up to date specimen collection information, as well as an electronic Supply Order Catalog to place your supply orders online. Items available on our website include:
