

McKesson/HAC Users' Notes

March 2006

TEST CHANGES IN HAC

The following tests have been made non orderable in HAC:

- **4496/QHD HIV 1&2 DNA PCR Qualitative**

This test panel is no longer available. Each component of the test must be ordered individually as an MSO.

- **33/AM2 Amylase, 2 Hour Urine**
- **36/AMU Amylase, 24 Hour Urine**

For any timed urine Amylase request, the following panel should be ordered:

29/ATU Amylase, Timed Urine

DIAGNOSIS CODE REMINDER

When entering the ICD-9 (diagnosis code) please verify that you are providing the specific code for the lab tests. Be sure to include the 4th and 5th digit as required and do not use the rule out or "screening". These will generate a billing correspondence letter back to you asking for further clarification

Diagnosis Code Reminder

Updated Procedures

UPDATED PROCEDURES

Due to phone/fax number changes, several of the procedures and the table of contents for the HAC User's Resource and Training Materials book have been revised. Also, a new procedure for ordering and manifesting a STAT specimen has been created.

The following updated items have been included with this newsletter. Please replace the outdated documents in your book with these.

- Table of Contents
- Phone List
- Brief Instructions
- Adding a Patient to the Database
- Change Request Form
- User ID Request, Non-Allina Employees

The new procedure, Order Entry & Manifesting a STAT Specimen has also been included. Please insert this new procedure into your book following the regular Order Entry Procedure.

If the revision dates on any of the documents in your book do not match those indicated on the new Table of Contents, please contact your AML Account Representative.

If you have any questions regarding any of this information, please contact your Allina Medical Laboratories Account Representative:
