September 2005

TEST CHANGES IN HAC

The following new tests have been made orderable in HAC:

Biointact PTH	BIP/5860
Quantitative Bronchial Culture	QBC/7620
Viral General Culture	VGC/7635

Before ordering an MSO, please always use the HAC "Search" function to make sure that the test is not orderable.

Please refer to your AML Collection Manual for specimen collection, processing and transport requirements.

Effective October 1, 2005 the following tests will be made non orderable in HAC (replaced by VGC/7635):

Viral Culture – Throat	4727/VTH
Viral Culture – Eye	4719/VEY
Viral Culture – Dermal (Skin)	4725/VDM
Viral Culture – NP/Nasal	4722/VNA
Viral Culture – Oral	4721/VCG
HSV Culture, Gentl-Child	5852/U12
HSV Culture, Non-Gentl	5882/OHR
RSV Culture	4740/RSC

CYTOGENETICS, FLOW, MOLECULAR, NON-GYN CYTOLOGY AND HAC

At this time, Cytogenetics, Flow, Molecular and Non-GYN Cytology testing can not be ordered in the HAC system. If your providers are requesting any of these types of tests, they must be ordered using an AML Manual requisition for the appropriate tests.

If you are in need of any of these requisitions, please contact your AML Account Representative.

PATIENT NAME CHANGES

If one of your patients has a name change, for accuracy and maintenance of the medical records, it is imperative that the name be changed in all computer systems, not just in HAC.

Changing the name in HAC does not automatically update all other systems. If your patient has changed their name and the correct name does not appear in HAC, please follow the attached procedure so that all systems can be properly updated.

Please insert the procedure into your HAC User Training and Resource Manuals for future reference. For your convenience, an updated Table of Contents for these manuals has also been included with this newsletter.

If you have any questions regarding any of the information included in this newsletter, please contact your AML Account Representative:
