Re: Topiramate Specimen Transport Temperature Change Notification

We have received notice from Mayo Medical Laboratories that due to a change in temperature requirements by the test kit manufacturer, effective immediately, the preferred transport temperature for Topiramate, Serum (2922/TOP) has been changed from refrigerated to **Frozen**. Refrigerated specimens will only be acceptable if received at Mayo within 24 hours.

The AML on line Collection Manual, located at www.allina.com/medicallaboratories, is being revised to reflect this new transport temperature.

If you have any questions regarding this change, please contact your AML Account Representative.
